

I would recommend that you support the XM Instant Traffic and Weather reporting. The radio provides a real asset to travellers and listeners. Since I pay for these services is it the prerogative of the National Broadcasters to determine what I should listen to? I truly wonder how we continue to lose our freedoms and our competition when decisions are made stifling competition and business. Let the market decide whether it should be there or not. I would respectfully urge the FCC to reject the NAB's petitions 04-160 and support XM's ability to provide the programming that I want and deserve as a paying customer.
